# Forward-Looking Statements

During the course of this presentation, we may make forward-looking statements regarding future events or the expected performance of the company. We caution you that such statements reflect our current expectations and estimates based on factors currently known to us and that actual events or results could differ materially. For important factors that may cause actual results to differ from those contained in our forward-looking statements, please review our filings with the SEC.

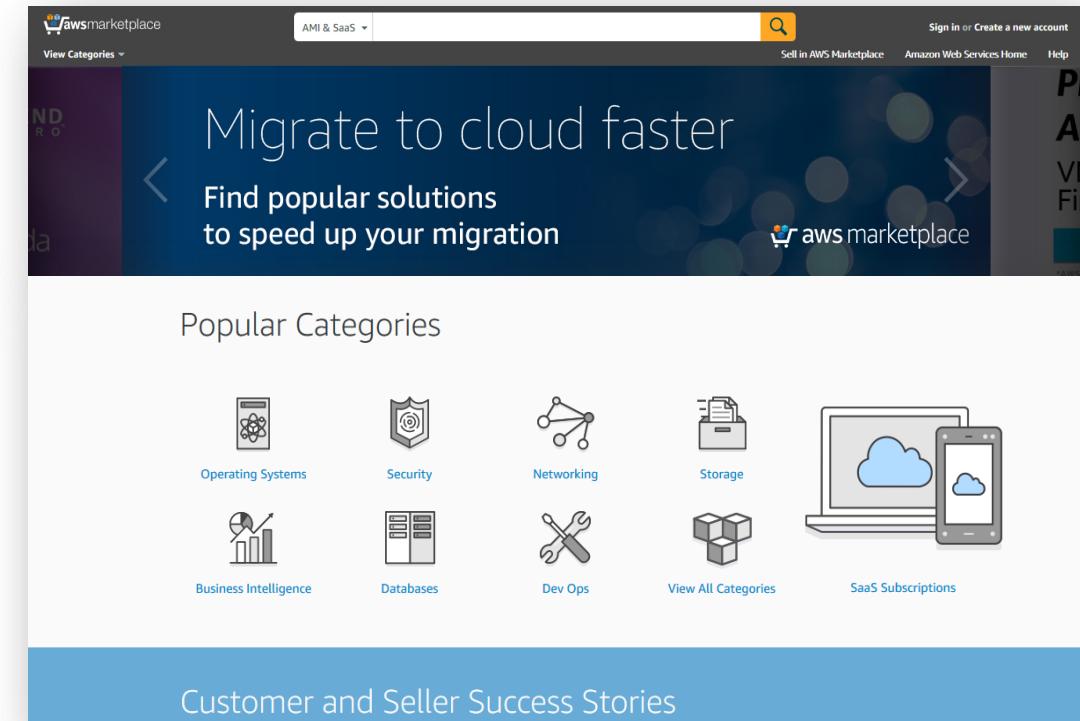

The forward-looking statements made in this presentation are being made as of the time and date of its live presentation. If reviewed after its live presentation, this presentation may not contain current or accurate information. We do not assume any obligation to update any forward-looking statements we may make. In addition, any information about our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. Splunk undertakes no obligation either to develop the features or functionality described or to include any such feature or functionality in a future release.

## Product Overview

Splunk Insights for AWS Cloud Monitoring is available FREE for a 15-day trial and converts to an hourly pricing model. This hourly offering comes provisioned for 10GB of indexing volume per day, which is generally sufficient capacity for an average AWS environment. You can also purchase an annual contract (with a discount to list price) through AWS Marketplace private offers by contacting sales at [https://www.splunk.com/en\\_us/talk-to-sales/aws-cloud-monitoring-insights.html](https://www.splunk.com/en_us/talk-to-sales/aws-cloud-monitoring-insights.html).

This product delivers an analytics-based approach to cloud monitoring by providing end-to-end visibility into a customer's AWS infrastructure, delivering real-time awareness of performance, health, configuration, security and infrastructure spend. With the analytics capabilities of Splunk, this solution can help customers predict AWS usage and optimize their AWS infrastructure to maximize savings. Splunk Insights for AWS Cloud Monitoring can be deployed via AWS Marketplace to correlate AWS data with other sources, across hybrid environments via a single platform with pre-built dashboards and visualizations.

## Highlights

- Monitor the security of your entire AWS environment, including AWS audit activity, unauthorized users, VPC flow logs, and key-pair and security group violations. Visualize and report on system and application metrics in your AWS environment.
- Visualize and interact with your AWS topology to conduct security compliance checks and gain recommendations to manage costs and more efficiently utilize resources.
- Lower costs using predictive analytics to estimate your monthly billing and optimize spend with the reserved instance planner.

# AWS Marketplace Demo

Presented by David Aiken

# Seller Private Offers

## custom pricing and license terms

Customers can request and negotiate prices and terms for large deals

All standard AWS Marketplace benefits still apply

Sellers can enroll in the Enhanced Data Sharing program to get started

# Key Takeaways

1. Use AWS Marketplace to accelerate your cloud migration
2. Simplify your procurement process with AWS Marketplace
3. Get started today with a 15-day free trial of Splunk Insights for AWS Cloud Monitoring on AWS Marketplace.
